

LIBELLULA 1-3”

**ENGINE HONDA eGX
with battery**

Libellula

Pompe autodescanti a membrana

Self priming diaphragm pumps

Pompes auto-amorçantes á membrane

Caffini supports the green world!

For the first time, a diaphragm pump coupled to a battery-powered electric motor is being tested.

The following tests were performed:

1. Battery at maximum charge, motor at 2700 rpm, 63 pulsations/minute, suction from 4 to 6 m, delivery at zero: battery life 65 minutes
2. Battery at maximum charge, motor at 2700 rpm, 63 pulsations/minute, suction from 4,5 m, delivery at 10 mt: battery life 65 minutes

The battery is fully recharged in one hour and 25 minutes.
